Hi, welcome to the group!

Lea Ontong

Hi, thanks for adding me

5:45 PM

Title

Delegates

Section

Chapter 1

Content

Purpose: The main circuit board that connects all components. It provides slots for the CPU, memory, storage, and expansion cards, facilitating mmunication between them.

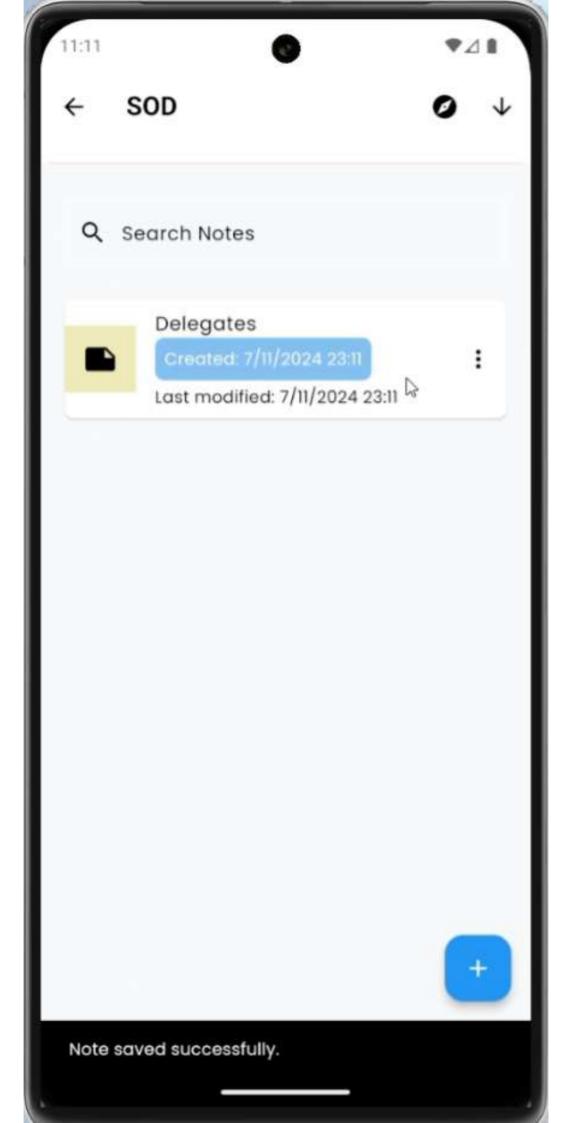

Sav Note

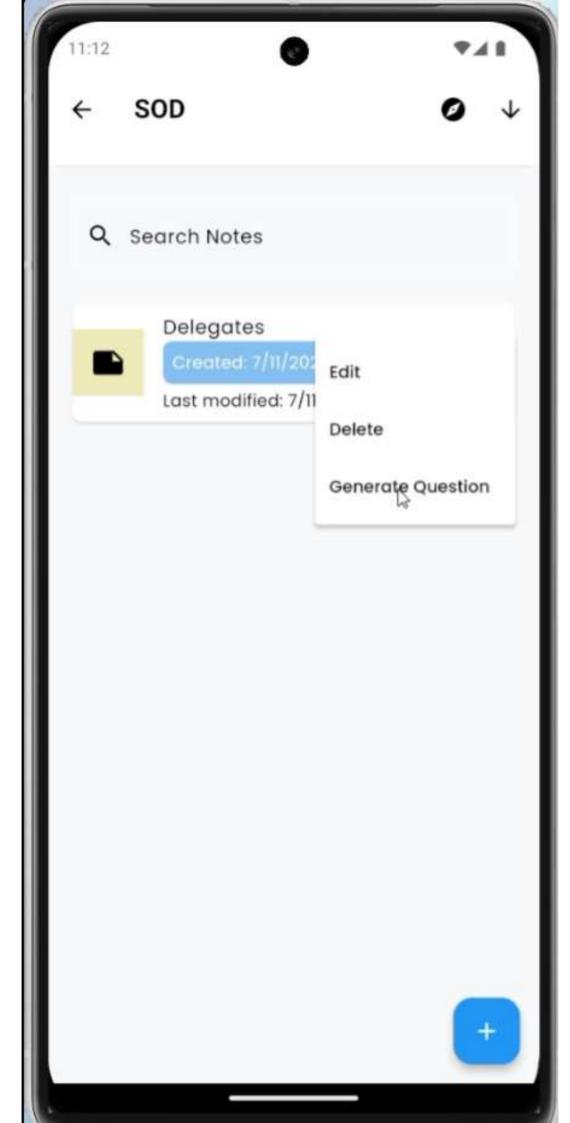

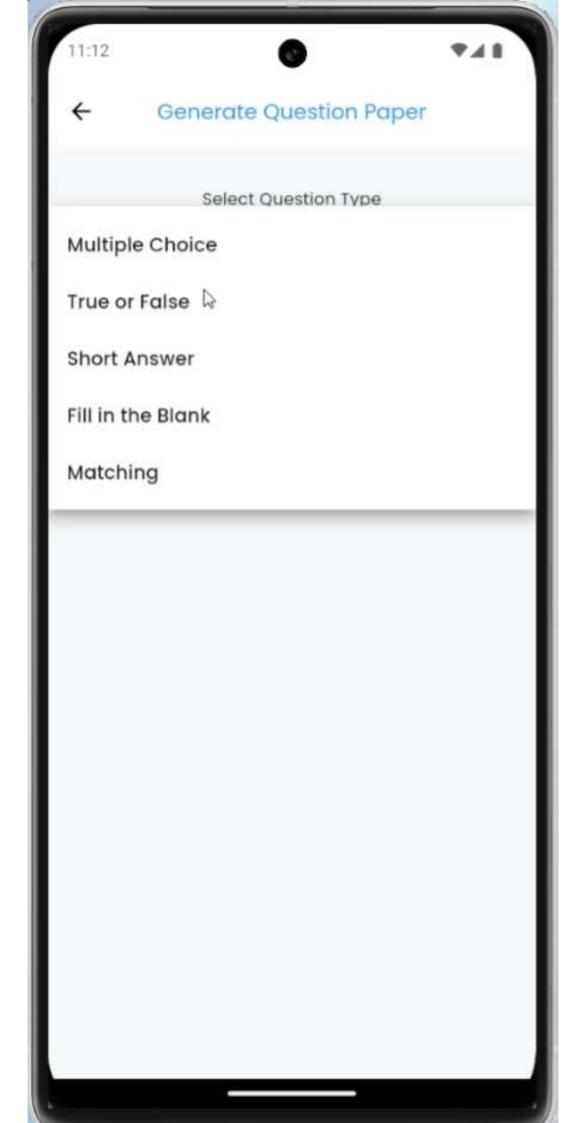

Chapter 1

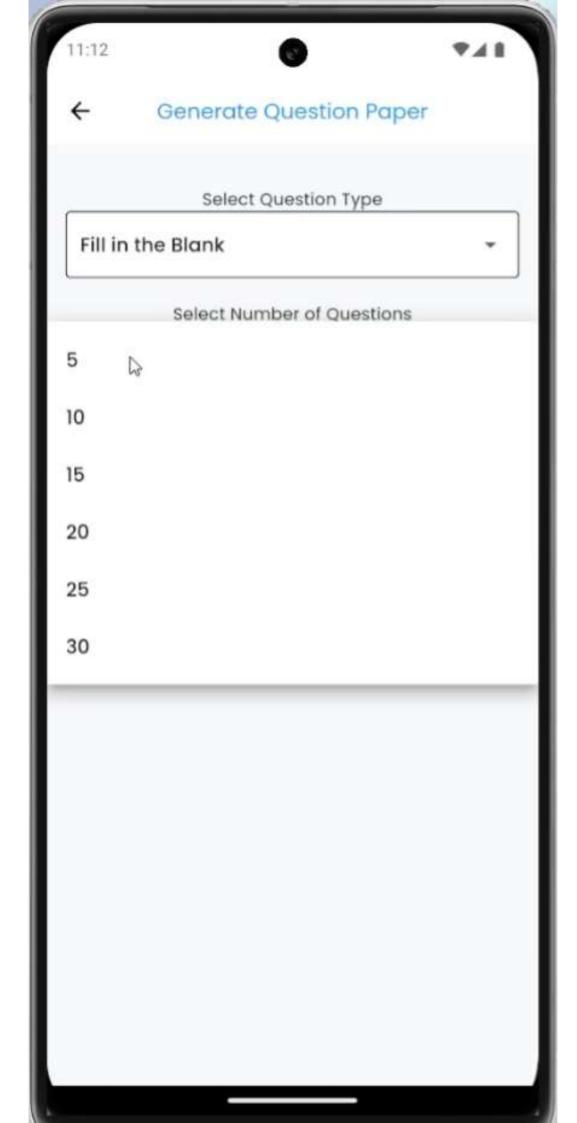

1. Central Processing Unit (CPU)
Purpose: Acts as the "brain" of the
computer, executing instructions from
software applications and managing
tasks. It performs calculations and
operations required by the system and
coordinates with other components.

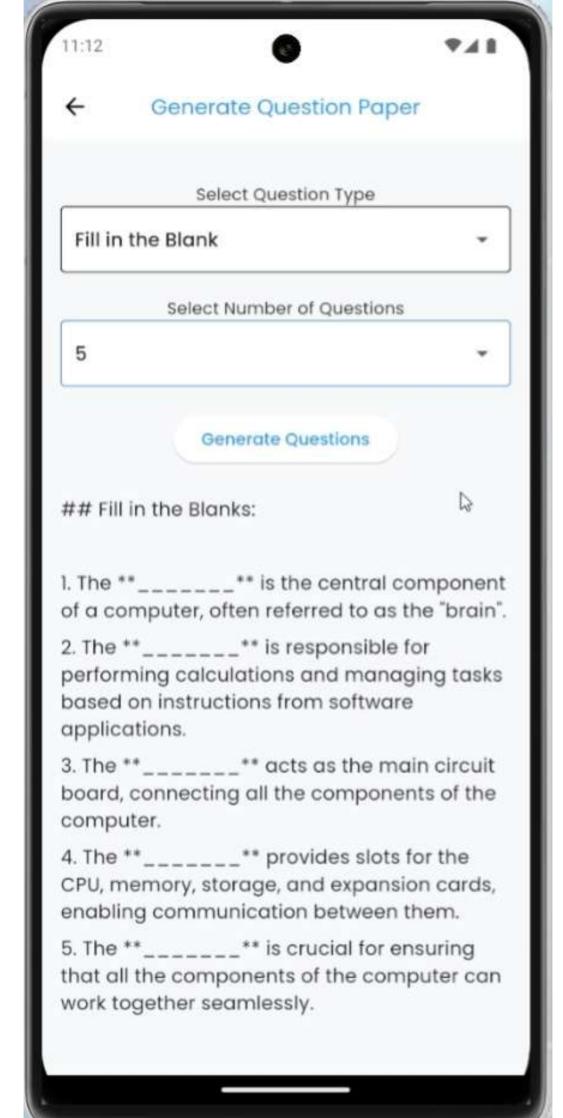

2. Motherboard

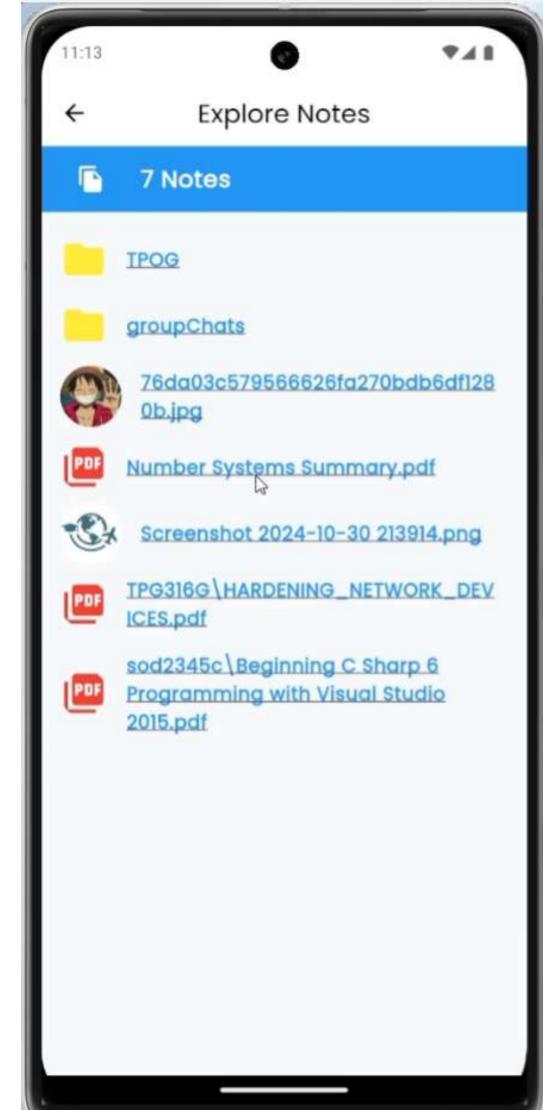

Purpose: The main circuit board that connects all components. It provides slots for the CPU, memory, storage, and expansion cards, facilitating communication between them.
